How to use Safe Exam Browser (SEB) to take quiz in Moodle?

Safe Exam Browser (SEB) is a web browser environment to carry out e-assessments safely. The software turns any computer temporarily into a secure workstation. It controls access to resources like system functions, other websites and applications and prevents unauthorized resources being used during an exam. SEB runs on a local computer and it is connected via the internet to a learning management system (LMS) or an e-assessment system. Students have to download the SEB program to their computer and do a little change in the SEB configuration Tool area.
